

[Background]

- Name: Pieter van Dijkhuizen
- Age: 25
- Education:
 - 2006-2012: Medicine
- Previous research:
 - MTX toxicity
 - MTX response

[Project outline]

- MD-Paedegree
- Develop prediction models JIA patients
- 2 years follow up
- Heterogeneous data
 - Clinical, immunological, imaging...
- Outcome: remission and damage

[EUTRAIN]

- Translational research, connecting
 - Clinics: patients
 - Lab: Luminex[®], micro biome
- Multicenter, i.e. networking
- Secondment: “flank CAMELOT for the development of a new integrated computational model for the analysis of heterogeneous data”

[Planning next year]

- EUREKA course
- Ultrasound and MR imaging
- Research ethics and integrity
- Biostatistics and epidemiology
- Research project management

- Project: patient enrollment and follow up
